

Handbook on Energy Justice

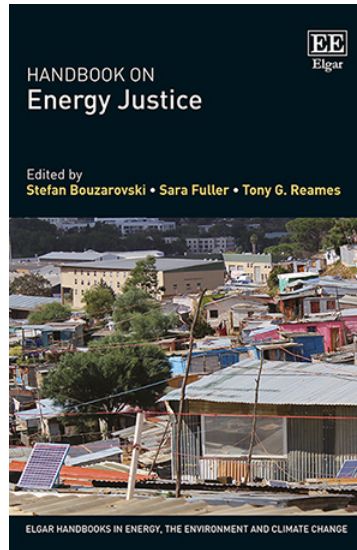

Elgar Handbooks in Energy, the Environment and Climate Change

Edited by Stefan Bouzarovski, School of Environment, Education and Development, The University of Manchester, UK, Sara Fuller, School of Social Sciences, Macquarie University, Australia and Tony G. Reames, School for Environment and Sustainability, University of Michigan-Ann Arbor, US

Offering a unique and critical perspective on energy justice, this Handbook delves into an emerging field of inquiry encapsulating multiple strands of scholarship on energy systems. Covering key topics including generation, transmission, distribution and demand, it explores fundamental questions surrounding policy, climate change, security and social movements.

'The Handbook on Energy Justice offers a rich collection that both consolidates the field and pushes its boundaries in new and interesting ways, drawing together multiple and divergent accounts of the possibilities and challenges of energy justice as a concept and call to action. A much-needed compass for our challenging times.'

– Harriet Bulkeley, Durham University, UK
