Inclusive Urban Development in the Global South

Intersectionality, Inequalities, and Community

Edited by **Andrea Rigon**, Associate Professor, University College London and **Vanesa Castán Broto**, Professor of Climate Urbanism, University of Sheffield

The book emphasizes the importance of the neighbourhood in urban development planning, with case studies aimed at transforming current intervention practices towards more inclusive and just means of engagement with individuals and communities. The chapters explore how diversity of gender, class, race and ethnicity, citizenship status, age, ability, and sexuality is taken (or not) into account and approached in the planning and implementation of development policy and interventions in poor urban areas. Case studies examine issues such as water and sanitation planning in Dhaka, indigenous rights to the city in Bolivia, post-colonial planning in Hong Kong, and many more.
